About me

- Computer Science and Engineering, University of Washington, since 1986
- Indian Institute of Science, 1993-1994
- Digital Health Solutions, PATH, since 2009

University of Washington projects

- Tutored Video Instruction
- Classroom Presenter
- Digital Study Hall
- Mobile Women and Child Health (MWach)
- Open Data Kit
- ODK Scan
- ODK Sensors
- Mobile Job Aids
- Immunization cold chain monitoring

PATH's Projecting Health Approach

Innovating Approaches for Changing Behaviors

Traditional methods

New opportunities

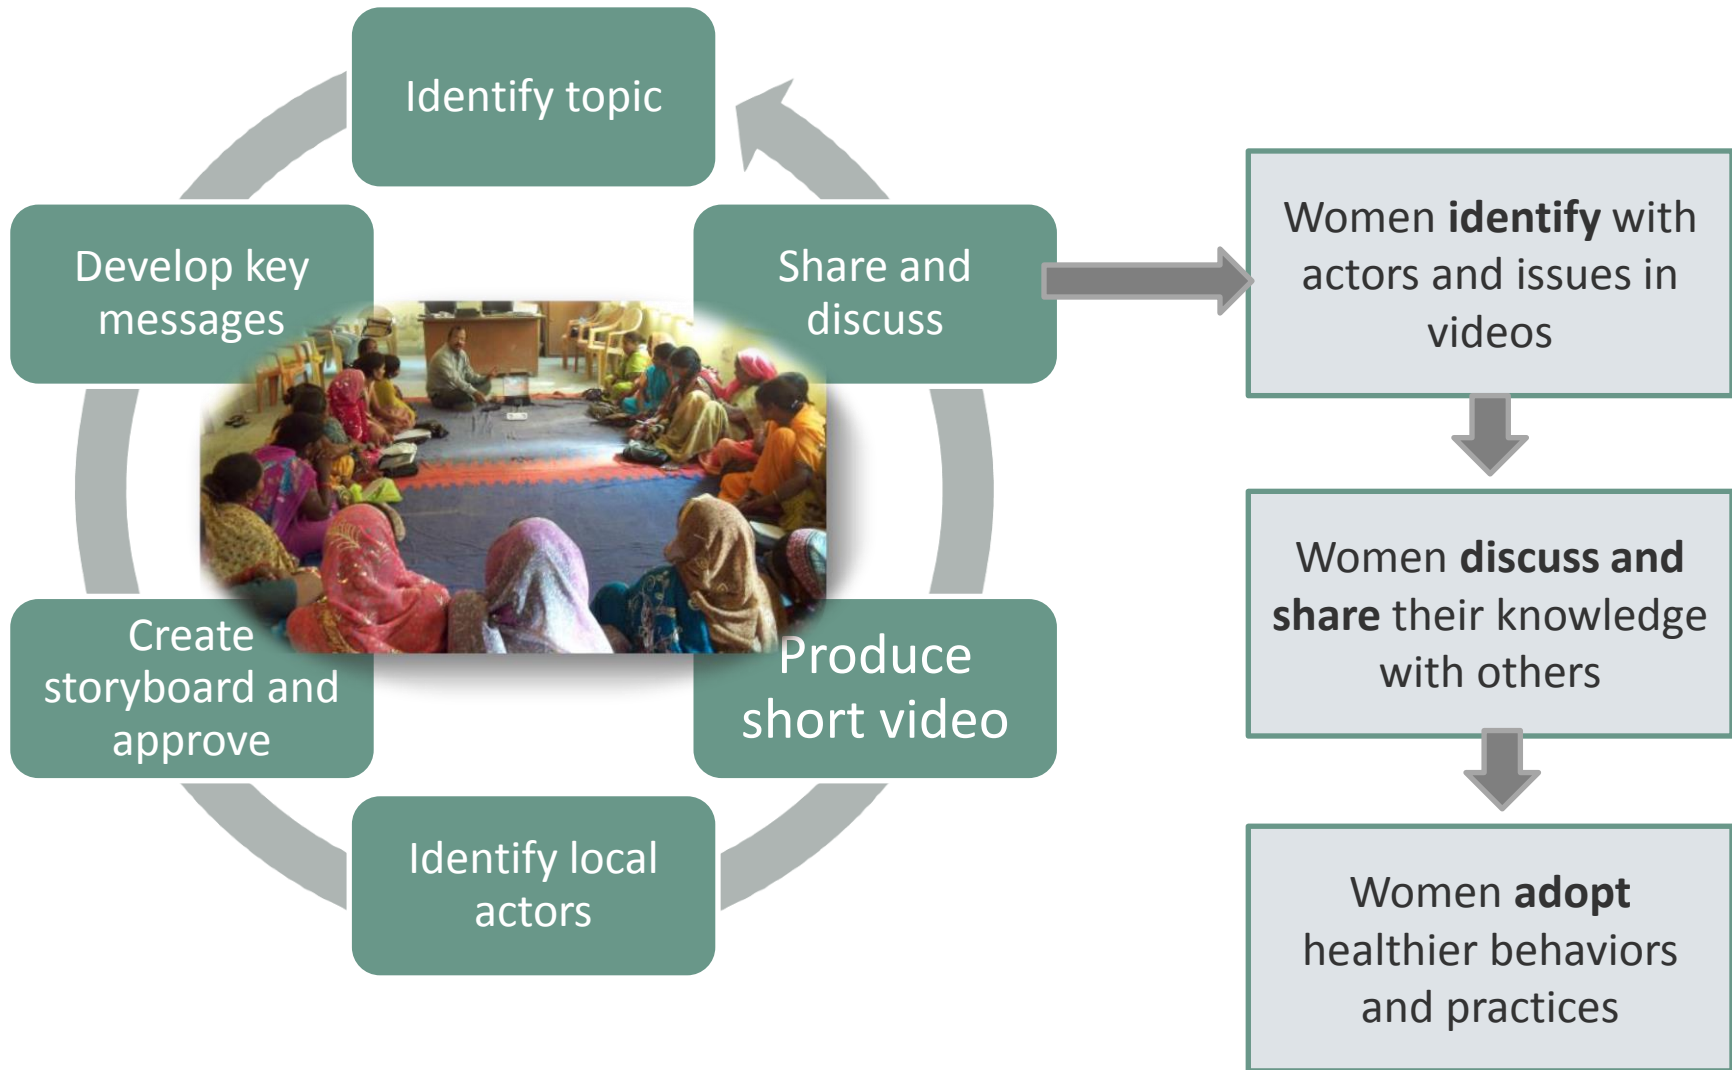

Revolutionizing Behavior Change Communication

Empowering communities to share healthy practices through an **evidence-based, locally-driven** approach for **low-cost video production** and dissemination.

The Projecting Health Process

Projecting Health Process

Review and approval

A		B		C		D		E		F		G		H		I		J	
1 Name of Writer: Kumar Vikram				2 Type of subject (Phase ticks): 1. Descriptive, 2. Survey, 3. Activity															
3 Title of Video: LAM (Lactational Amenorrhea Method)				4 Introduction, 4. Discussion, 5. General Awareness															
4 Duration of Video: 8 minutes				5 Storyboard Preparation date: 18th September 2012															
5 Section		Contents of the section		Time		Facilitating Questions		Camera Focus											
6 Introduction (#ha?)																			
7 Subject & Objective (#ha?)(#ha?)																			
8 Materials (What? How much?)																			
9 Process (#how?)		<ul style="list-style-type: none"> A modern, temporary family planning method that has been developed as a tool to help support both breastfeeding and family planning use. It is based on the natural infertility resulting from certain patterns of breastfeeding. 		What is LAM (Lactational Amenorrhea Method)?															
10		<ol style="list-style-type: none"> the woman's menstrual periods have not returned, AND the baby is fully or nearly fully breastfed, AND the baby is less than six months old. 		Who can use LAM?		Moral ballad: Feedings during the day need to happen at least every 4 hours (minimum), and at least one night time feeding to happen at least every 6 hours (minimum). And although I know sometimes it does seem to be or near full breastfed, let's keep the messaging strong and always stay exclusive breastfeeding.													
11		The LAM user should be counseled to use another contraceptive method for continued protection when: <ol style="list-style-type: none"> Her menstrual periods return. She begins feeding her baby other liquids or sleeps through the night. Her baby is older than six months. 																	

Project status

- Deployed in Raebareli District, UP
- Implementing Partners: GVS and NYST
- 87 villages, 135 mothers groups
- 70 videos developed
- 6,194 disseminations
- 70,000 people reached
- High level of community engagement
- 3 Community Advisory Boards

Sample topics

Breastfeeding

- Optimal breastfeeding practices
- Exclusive breastfeeding
- LAM

Thermal care

- Thermal care overview
- Delay bathing

Family planning

- Permanent methods
- Temporary methods
- NSV-No scalpel vasectomy
- IUCD Copper-T

Cord care

- Cord care overview
- Myths and misconceptions

Birth preparedness

- Birth preparedness overview
- Maternal danger signs
- Maternal nutrition
- Newborn danger signs

Other

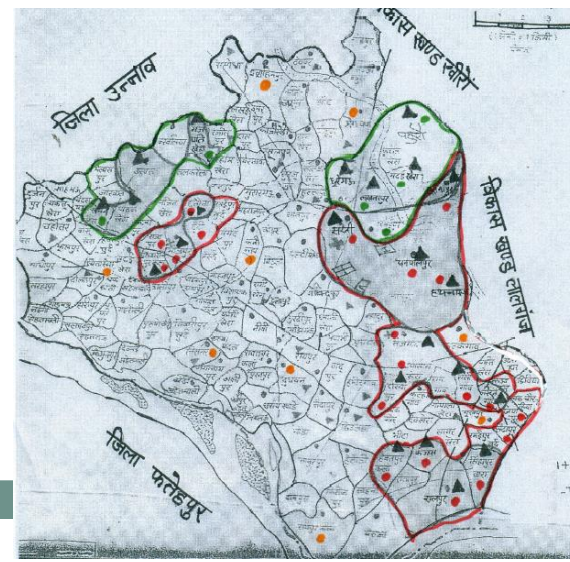

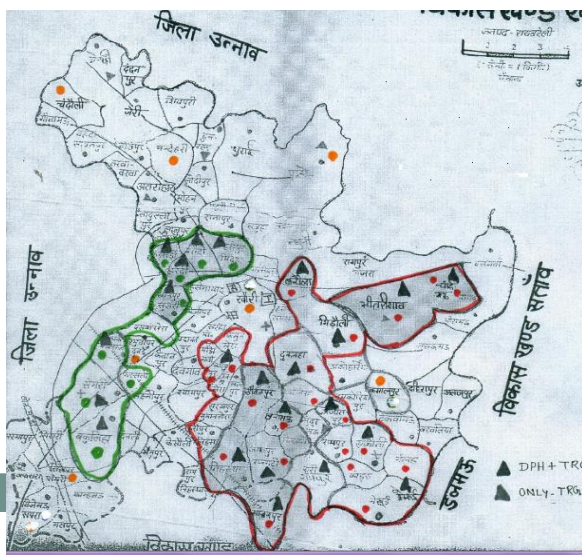

- Immunization
- Community-based emergency transportation systems

Key components of Projecting Health

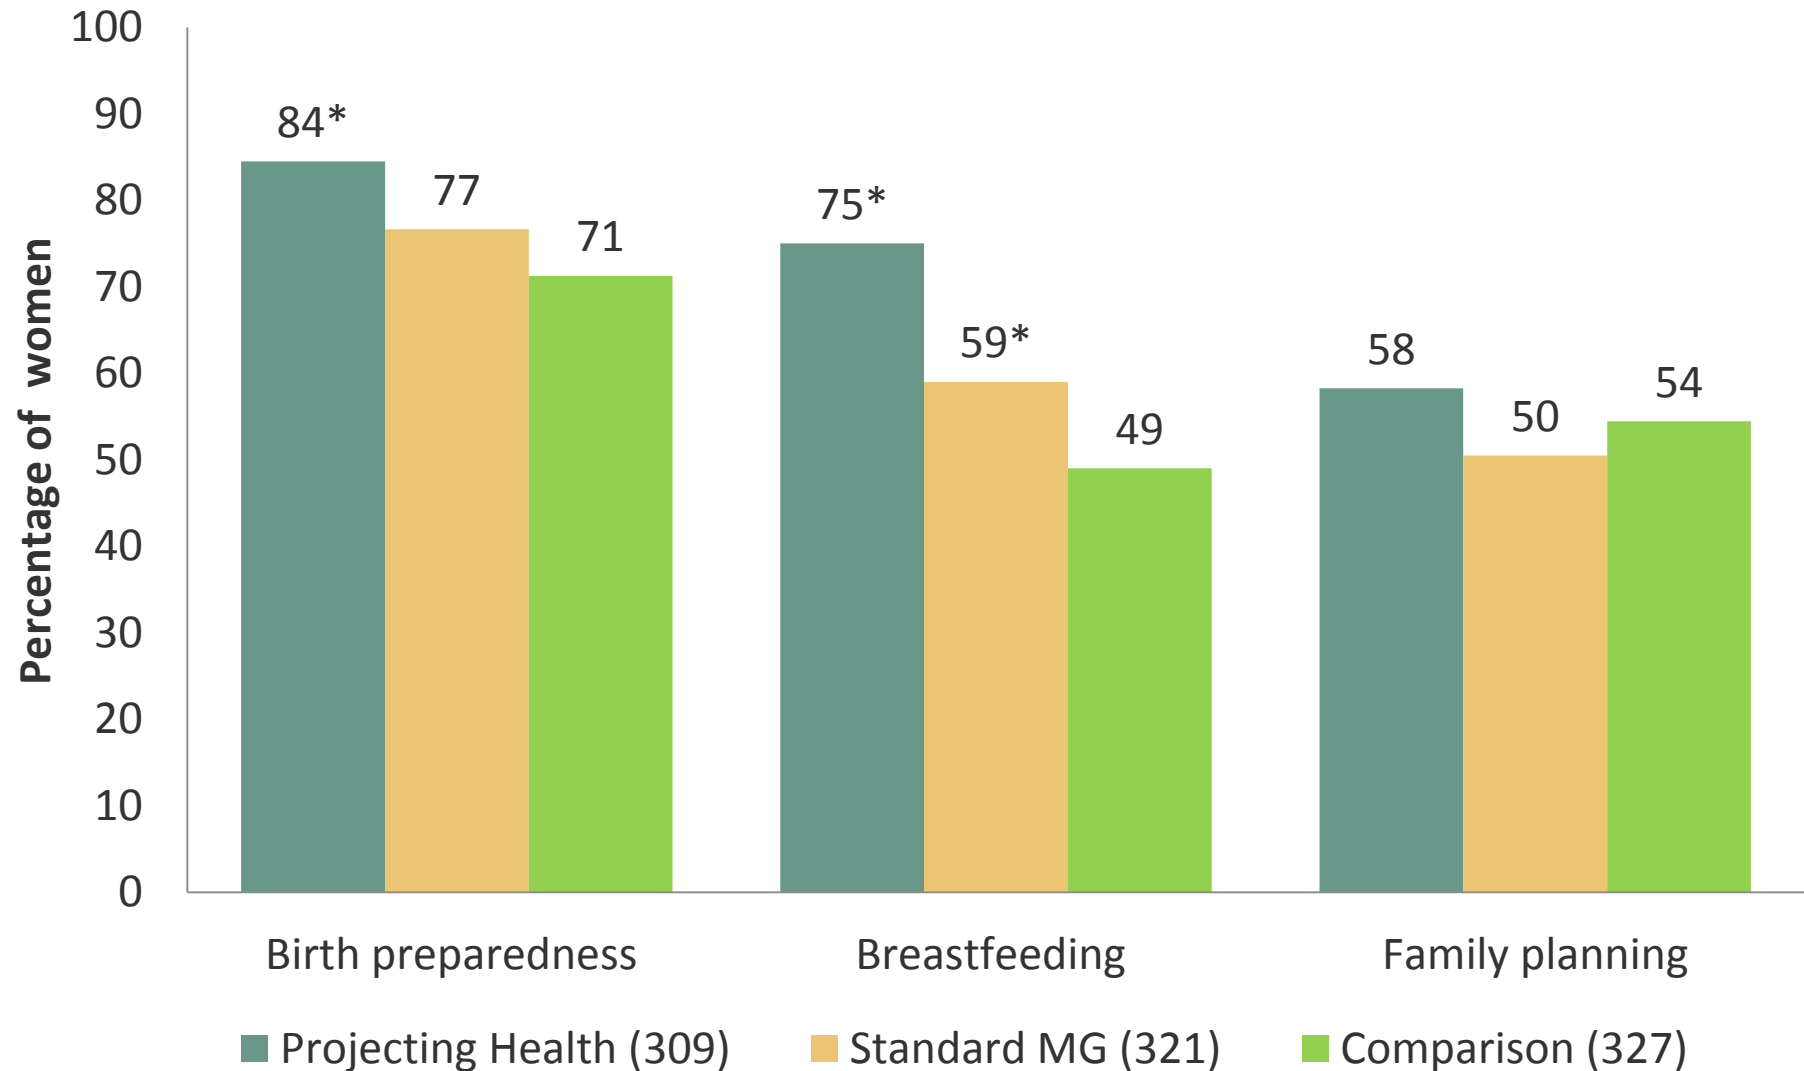

- Locally created video
 - Developed close to the community
 - Local people as actors
 - Process to vet key messages and quality
- Video dissemination model
 - ASHAs as facilitators in Mothers' groups
- Community support for program
 - Community advisory board
 - Local ownership

End line evaluation

- Three arms
 - Projecting Health video intervention
 - Mothers' group only intervention
 - No intervention
- Outside evaluation firm surveyed mothers on knowledge of key practices and self reported behavior
