lines [0 0 0 0 0 0 0 0 0 0 0 0]

$$= n_1 \cdot n_2 \cdot \dots \cdot n_k$$

How many 5 letter words?

$$26^5 = 26 \cdot 26 \cdot \cdot 26$$

words of length 5 [0 0 0 0 0 0 0 0 0]

$$- S, |S^k| = |S|^k$$

S = letters of alphabet

S^5 = words of length 5.

Suppose S is a finite size n

• How many subsets does S have?

$$\begin{matrix} 2 \\ \cdot \\ 2 \\ \cdot \\ 2 \\ \vdots \end{matrix} = 2^n$$

0 0 0 0 0 0 0 0 0 0 2

$V \in \{0,1\}^n$ indicator vector of subset

2 choices for v_1

2 choices for v_2

2 choices for v_n

} 2^n choices

6 TA's, 4 sections

How many ways to assign TAs to sections so that no section gets 0 TAs?

A = set of sections taught by Yifan

B = " " " " Yael

F = " " " " Su

X

2^4 choices for A

2^4 " for B

2^4 " " F

} $(2^4)^3 = 2^{12}$ choices.

A: set of TA's teaching 1st section

B: " " 2nd "

C: " " 3rd "

D: " " 4th "

2^6 possible subsets of TA's

$2^6 - 1$ of them are non-empty

choices for A = $2^6 - 1$
"

choices D = $2^6 - 1$

choices
 $(2^6 - 1)^4$

5 books and 3 children

Alice, Bob, Charlie

1
2
3
4
5

A: set of books given to Alice

B: _____

C: _____

$$2^5 \times 2^5 \times 2^5 = 2^{15}$$

Book 1 : 3 choices

: 3 choices

$$\# \text{ choices in total} = 3 \cdot 3 \cdot 3 \cdot 3 \cdot 3 \\ = 3^5 \quad \checkmark$$

FACTORIAL

How many ways to rearrange letters
in GRAPEFRUIT — 10 letters

XGRAPEFRUIT

XAGPEFRUIT

⋮

$$\begin{array}{ccc} ? & ? & \\ \vdots & \vdots & \\ 10 & \cdot & 9 \quad \dots \end{array} \quad \begin{array}{l} \# \text{ choices} \\ = 10 \cdot 9 \cdot 8 \cdot \dots \cdot 1 \\ \quad \quad \quad \parallel \\ \quad \quad \quad 10! \end{array}$$

choices choices

$$n! = n \cdot (n-1) \cdot \dots \cdot 1$$

$$\begin{array}{cccccccccc}
 0 & 0 & 0 & 0 & 0 & 0 & 0 & 0 & 0 & 0 \\
 \hline
 \begin{array}{cccccccccc}
 \uparrow & 2 & 3 & 4 & \dots & & & & & 10 \\
 (G & R & A & P & E & F & X & U & I & T \\
 \downarrow & \downarrow & \downarrow & & & & & & & \\
 2 & 3 & 4 & 5 & \dots & & & & & 10 \\
 R & A & G & P & E & F & X & U & I & T
 \end{array}
 \end{array}$$

of bijections from $[10] \rightarrow [10]$

How many 5 letter words in English where letters are distinct?

$$\begin{array}{cccccc}
 ? & ? & ? & ? & ? \\
 \downarrow & & & & \\
 26 & 25 & 24 & 23 & 22 = \frac{26!}{21!} \\
 \text{choices} & & & &
 \end{array}$$

$$P(n, k) = \frac{n!}{(n-k)!}$$

= # ways to make a sequence of length k from a set of size n with no repetitions

OVERCOUNTING

26 letter words, all letters distinct = $26!$

For every such word, take first 5 letters

Each 5 letter word is counted $21!$ times

$$\Rightarrow \# \text{ 5 letter words} = \frac{26!}{21!}$$

How many ways to arrange
GRAPEFRUIT?

$$\frac{10!}{2!}$$
