- What is Software Engineering
- Course overview and expectations

# The CSE 403 team

## Instructor

- René Just ([rjust@cs.washington.edu](mailto:rjust@cs.washington.edu))
- Office hours: After class and by appointment

## Teaching assistants/project managers

- Jesse Hu
- Ben Kushigian
- Edward Misback
- Reshabh Sharma
- Apollo Zhu

# Logistics: meetings

- **Lectures:** M/W/F 12:30pm – 1:20pm (G10)
- **Team meetings:** Tue 1:30pm – 2:20pm (ECE 125)
- **Project meetings:** Thu 1:30pm – 2:20pm (G10)

**This Thursday only:**

**Work on project proposal with your assigned partner.**

# Logistics: resources

- **Course website:**

<https://homes.cs.washington.edu/~rjust/courses/CSE403> ([cs.uw.edu/403](https://cs.uw.edu/403))

- Submission of assignments via **Canvas:**

<https://canvas.uw.edu>

- Discussions on **Slack:**

<https://cse403-wi23.slack.com>

# Logistics: communication

## Communication guidelines

- We use Slack for all **non-sensitive** communication.
- See the [Slack guidelines](#) for this course.

## Resources

- The go-to page for this course is the [course web site](#).
- All relevant information is on the website, or linked from it.
- Canvas for assignments and non-public materials.

- Empirically evaluating a software system?

- Writing (design) docs?

**All of the above and much more!**

# What is Software Engineering?

## More than just writing code

The complete process of specifying, designing, developing, analyzing, deploying, and maintaining a software system.

- Common Software Engineering tasks include:
  - Requirements engineering
  - Specification writing and documentation
  - Software architecture and design
  - **Programming** Just one out of many important tasks!
  - Software testing and debugging
  - Maintenance and refactoring

# Why is Software Engineering important?

## Software is eating the world!

### Apple finally fixes 'gotofail' OS X

The 'Heartbleed' security flaw that affects most of the Internet

released a system software update known as the "gotofail"

### Facebook Patches Access Token Leak

Users should change their passwords to mitigate threats posed by the accidental leak of perhaps millions of account identity details.

# Why is Software Engineering important?

Software is eating the world!

Unfortunately, WhatsApp has stopped.

Apple finally fix

The 'Heartbleed' security flaw that affects most of the Internet

# Summary: Software Engineering

## **What is Software Engineering?**

- The complete process of specifying, designing, developing, analyzing, and maintaining a software system.

## **Why is it important?**

- Decomposes a complex engineering problem.
- Organizes processes and effort.
- Improves software reliability.
- Improves developer productivity.

# Course project overview

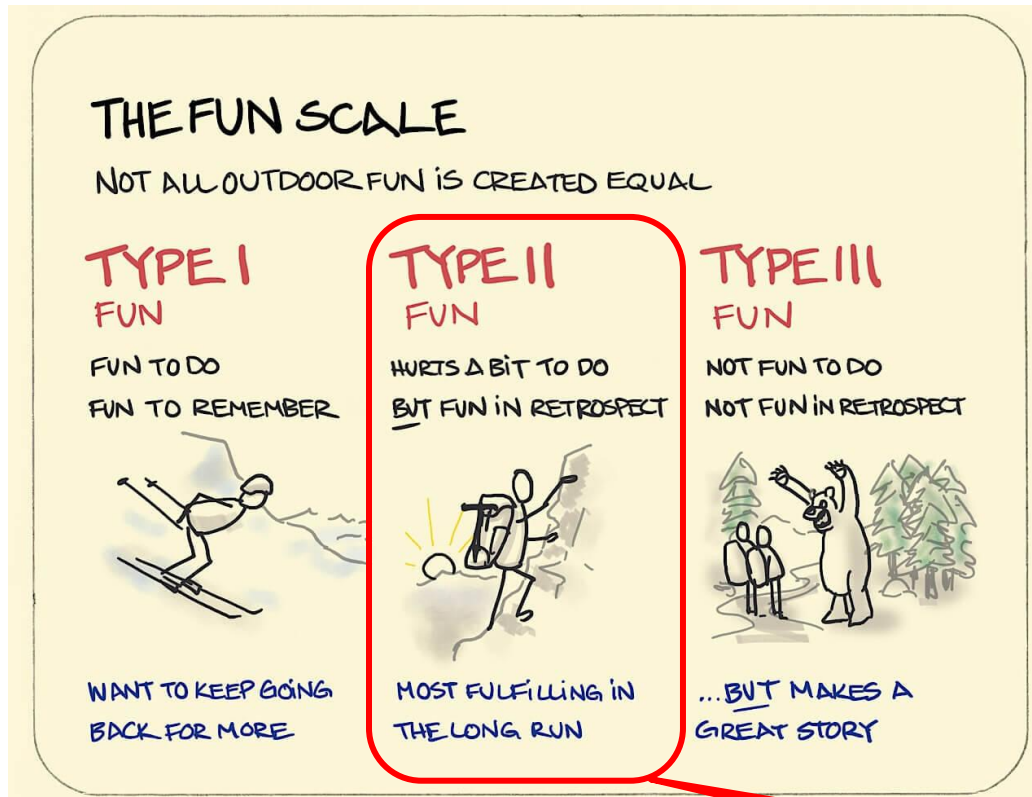

# Course project proposals

# Course project categories

## Example categories

- Productivity and convenience apps
- Optimization problems and data science
- Gaming and making
- Extensions to open-source software
- Software Engineering research (prototypes)

# CSE 403 in one picture: mostly type II fun

Sweet spot for teaching

# Expectations

- Programming experience and familiarity with one programming language (Java, C++, ...).
- Active participation in discussions.
- Teamwork and communication (Slack).
- Reflecting on and improving submitted materials.

# CSE 403: challenges for students

## **Team work**

- Effective communication and coordination
- Different backgrounds, skills, and incentives

## **Complexity**

- Tooling and technology stacks
- Scale of code base

## **Uncertainty**

- No simple check-box grading
- Trade-offs, decisions, and justifications

# CSE 403: challenges for staff

## In-person vs. online education

2020: “Transition plan”

2020

Total Crap. Would  
Not Recommend.

2022: “How does this work?”

### Enrollment

- 2020: 40 students (2 TAs)
- 2021: 85 students (5 TAs)
- 2022: 110 students (6 TAs)
- 2023: 82 students (5 TAs)

### Time

- Project duration: 9 weeks
- Lecture time: 50 minutes
- Quick turnaround times

# What's next?

- *Thu: Work on project proposal (pre-assigned groups)*
- Fri: The Joel Test (or why you really should take 403)
