# **CSE 403**

Software Engineering Winter 2023

**Testing and CI** 

## Today

- Software testing 101
- Continuous Integration
- Live demo and Q & A

## Software testing: unit testing example

```
1 double avg(double[] nums) {
   int n = nums.length;
   double sum = 0;
   int i = 0;
   while (i<n) {
   sum = sum + nums[i];
     i = i + 1;
10
   double avg = sum * n;
11
   return avg;
12
13 }
```

### Testing: is there a bug?

```
@Test
public void testAvg() {
  double nums =
     new double[]{1.0, 2.0, 3.0});
  double actual = Math.avg(nums);
  double expected = 2.0;
  assertEquals(expected, actual, EPS);
}
```

## Software testing: unit testing example

```
1 double avg(double[] nums) {
   int n = nums.length;
   double sum = 0;
   int i = 0;
   while (i<n) {
   sum = sum + nums[i];
   i = i + 1;
10
   double avg = sum * n;
11
   return avg;
12
13 }
```

### Testing: is there a bug?

```
@Test
public void testAvg() {
   double nums =
        new double[]1., 2.0, 3.0});
   double a thial lark.avg(nums);
   double a thial lark.avg(nums);
   double a spected = 2.0;
   assertEquals(expected, actual, EPS);
}
testAvg failed: 2.0 != 18.0
```

## Software testing vs. software debugging

```
Testing: is there a bug?
   1 double avg(double[] nums) {
                                                                                                                                                                                        @Test
                   int n = nums.length;
                                                                                                                                                                                        public void testAvg()
                  double sum = 0;
                                                                                                                                                                                                   double nums =
                 int i = 0;
                                                                                                                                                                                                                        new doub. [
                                                                                                                                                                                                                                                                                                                 , (2.0, 3.0);
                 while (i<n) {
                                                                                                                                                                                                   double a hall
                                                                                                                                                                                                                                                                                             ath.avg(nums);
                 sum = sum + nums[i];
                                                                                                                                                                                                   double ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext{-}ext
                              i = i + 1;
                                                                                                                                                                                                   assertEquals (expected, actual, EPS);
                                                                                                                                                                                          testAvg failed: 2.0 != 18.0

```

## Unit testing, integration testing, system testing

### **Unit testing**

Does each unit work as specified?

### Integration testing

Do the units work when put together?

### System testing

Does the system work as a whole?

## Unit testing, integration testing, system testing

### **Unit testing**

Does each unit work as specified?

### Integration testing

Do the units work when put together?

### System testing

Does the system work as a whole?

Key focus in 403: unit testing

### Unit testing

- A unit is the smallest testable part of the software system (e.g., a method in a Java class).
- Goal: Verify that each software unit performs as specified.

#### Focus:

- Individual units (not the interactions between units).
- Usually input/output relationships.

## Testing best practices: motivating example

### Average of the absolute values of an array of doubles

```
public double avgAbs(double ... numbers) {
  // We expect the array to be non-null and non-empty
  if (numbers == null | numbers.length == 0) {
    throw new IllegalArgumentException("Array numbers must not be null or empty!");
  double sum = 0;
  for (int i=0; i<numbers.length; ++i) {</pre>
    double d = numbers[i];
    if (d < 0) {
      sum -= d;
    } else {
      sum += d;
  return sum/numbers.length;
```

What tests should we write for this method?

## Testing best practices: motivating example

### **Compare two values**

```
public class Comp implements Comparable < Comp > {
  private int number;
  public Comp(int number) {this.number = number;}
 @Override
  public int compareTo(Comp other) {
    if (other.number == this.number) return 0;
    return this.number < other.number ? -1 : 1;
public class CompTest {
 @Test
  public void testSmaller() {
    Comp c1 = new Comp(10);
    Comp c2 = new Comp(20);
    assertEquals(c1.compareTo(c2), -1);
```

## Live example: test automation

## Testing best practices

- Table-based testing
- Parameterized unit tests

## **Continuous Integration**

### CI/CD: What's the difference?

### **Continuous Integration (CI)**

- Integrates code into a shared repository.
- Builds/tests each change automatically.
- Complements local developer workflows (subset of tests vs. all tests).

### **Continuous Deployment (CD)**

- Builds on top of CI.
- Software can be deployed at any time.
- Automatically pushes changes to production.

403 focuses on establishing good CI practices.

## Live example: CI in action

## CI examples

- Travis CI
- GitHub Actions

## **Q & A**
